OUR DEAR PARTNER!

József Hajdú
founding owner,
executive manager

We believe that summer should not be an obstacle to maintaining the quality of dental care! In fact, this season is the time of the year when patients place the greatest emphasis on appearance and health. Why should you choose BIONIKA, even in the hottest summer months?

Constant stock: you don't have to worry about product availability in summer. BIONIKA staff are constantly updating and checking stocks, ensuring uninterrupted supply and immediate service.

Fast and reliable delivery: It is important for us to deliver your order as soon as possible. Even in the hottest months, our reliable delivery partners will ensure that the products you order arrive on time (usually within a few days) and, undamaged.

Flexible ordering options: During summer, time seems to fly faster and you are certainly very busy. Our user-friendly webshop makes it easy to order 24/7 from anywhere.

Customer service and professional support: BIONIKA not only offers products, but also professional support. Our team of experts is always at your service, whether it's professional advice, answering questions during the ordering process or identifying an unknown implant.

Special discounts: Summer is usually the time for special offers and this is no different at BIONIKA. With our special offers, we want to help you manage your budget more effectively and efficiently.

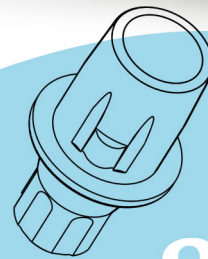

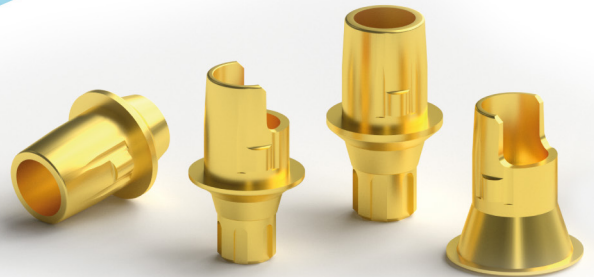

Zsolt Kovács

Innovation and Tradition

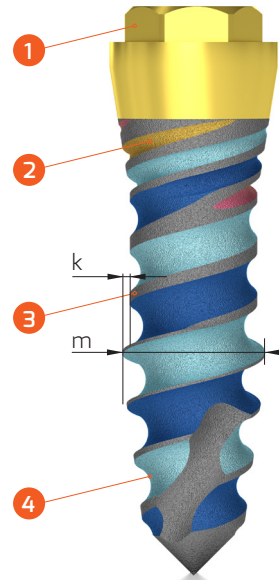

We do the impossible!

HYBRID IMPLANT SYSTEM

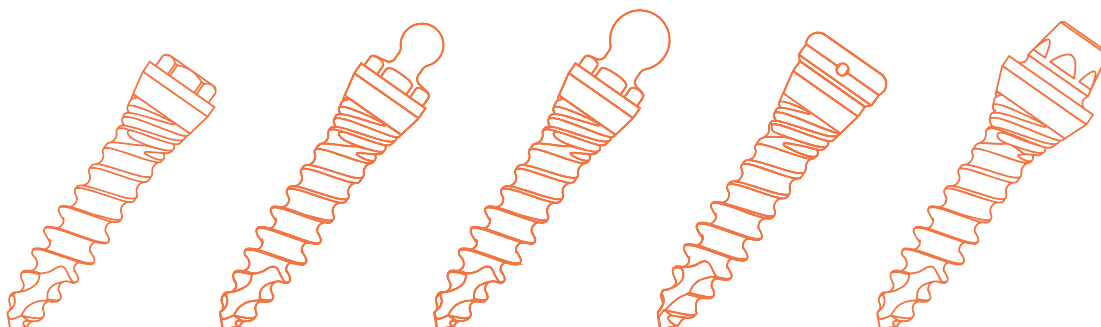

Structural parts of the Hybrid implant body:

1. The two-phase Hybrid Implant has a Brönemark® type internal tapered hexagonal head section.
2. Micro thread structure with four-crest cortical knuckle thread.
3. Two-crest normal knuckle threaded body section to dampen dynamic forces.
4. Cycloidal thread structure with increased contour and increased thread depth for primary stability, with self-cutting edge and anti-twist groove.

The main general feature of the BIONIKA Hybrid implant system is that following the natural analogy, all elements of the screw thread are radially formed with a continuously variable cross-section.

Antidote for fractured screws

Bionika Screw Extractor Kit

In the majority of fracture cases, the screw-free portion of the through screw remains in the implant. If it is loose in the implant thread, it can be easily rotated out using a wing-head nail screw removal kit.
