WELCOME

DEAR VALUED CUSTOMER,

Professionals who have recently started in the field of implantology rightly ask the question: which type and brand of implant would be the best choice. It is not surprising because a huge number of foreign systems enter the domestic dental implant market every year. BIONIKA as a Hungarian manufacturer strives to develop devices that meet the needs of professionals and are tailored to the individual patient. What can a Hungarian SME offer that a multinational company cannot? A lot!

József Hajdú
founding owner,
executive manager

- Many people don't realize that Hungary, although small in size, is a highly innovative country as evidenced by the many world-renowned Hungarian researchers and inventions. BIONIKA's mission is to develop unique, tailor-made, high quality devices that contribute to curing patients and improving their quality of life.
- BIONIKA places a strong emphasis on compliance with local and international regulations, ensuring that the medical devices you receive meet all the necessary safety and quality standards.
- In conclusion, if you choose BIONIKA, you will get the products you need from a highly innovative and creative Hungarian company with high quality production. We can also satisfy the need for tailor-made products, and we focus on complying with regulations and standards. Remember, BIONIKA gives a face to their products.

BIONIKA BIOLEVEL

BIOLEVEL is compatible with the following: ADIN® Standard®, Alpha Bio® IH 90°, BioHorizons®, CORTEX® Internal Hex Platform, Dentis®, MIS® Seven®, SGS® Internal Hex Platform, Implant Direct® Legacy®, Tri-Vent®, Zimmer (Tapered) Screw vent®

Our BIOLEVEL system ensures excellent fit, stability and fast installation through its conical & hex connection, platform switching technology and micro-grooved spiral surface. The 90° taper angle results in micromotion-free force transmission that superposes forces deep inside the implant. The rounded implant apex facilitates minor changes of direction during implant insertion, making the dentist's job easier.

BIONIKA IMPLIE

Compatibility of IMPLIE: Alpha Bio® CS (CS), Alpha Bio® NICE® CHC (NI)

Our IMPLIE system, already well-established in engineering practice, provides a perfect fit through the well-proven complex conical and hexagonal connection while creating ideal conditions for accurate open or closed tray impression. The implant is characterized by an epsilon-shaped (double-start) thread design that promotes a strong connection to the bone, increases initial stability and ensures uniform load distribution. The platform switching design allows the bone to slide onto the upper rim of the implant which increases stability over the long term.

MEET YOUR NEW FAVORITE IMPLANT SYSTEMS!

IN ADDITION TO BEING COMPATIBLE WITH ALPHA BIO® SYSTEMS, OUR IMPLANT SYSTEMS OFFER MANY ADDITIONAL BENEFITS:

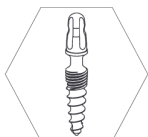

- **Cost-Effective:** No need for expensive new instrumentation; you can place our implants with the instruments you already have.
- **Seamless Transition:** Maintain your well-established surgical technique sequence as BIONIKA implants are fully compatible with your existing workflow.
- **Premium Quality:** Our implants are made from high-quality Grade 4 titanium and meet all necessary specifications and standards.
- **Reliable Worldwide Delivery:** Our service ensures that the products you need always arrive on time.
- **Competitive Pricing:** We offer unbeatable prices, so you get the best value for your investment.

Choose BIONIKA implants and experience the benefits of high quality, cost-effectiveness, and maximum precision!
