BIONIKA's future goals

In 2025, BIONIKA Medline Ltd. will proudly celebrate its 36th birthday and continue its commitment to manufacturing high-quality dental implants and abutments. Our goal is to further strengthen our position in the domestic and international market and continue to serve as a trusted partner to the dental community. We strive to continuously improve the quality and innovation of our products to offer the best solutions to patients and dentists.

József Hajdú
founding owner,
executive manager

We are also actively contributing to a better future through our sustainability efforts and our commitment to social responsibility. The primary goal of the BIONIKA Team for 2024 is to continue to increase the number of satisfied patients who can chew and smile with BIONIKA implants. However, to achieve this goal, we need your help, because our high-quality implants can only be properly applied by the most qualified professionals. We would like to thank our partners for their trust and loyalty, which we would like to reward this year with further discounts and exclusive offers.

Zsolt Kovács
Operative Manager,
Professional Advisor
