## Minimal Intervention, Maximum Stability

Would you like to work with implant systems that not only simplify dental procedures but also help treat challenging cases involving bone loss or limited space? With the rise of mini implants, a new era of dental implantation has begun. These innovative implants offer an outstanding alternative to traditional solutions. Developed by BIONIKA, our mini implant systems are ideal for patients with limited bone supply and are designed to enhance the efficiency of your dental practice.

Faster procedures, fewer risks, and exceptional results – without compromise.

**József Hajdú**  
founding owner,  
executive manager

### Why Choose BIONIKA Mini Implants?

- Minimally Invasive – Quick, easy insertion under local anesthesia with minimal tissue trauma. Enjoy faster healing and less discomfort.
- Cost-Effective – Premium quality at a reasonable price. Fewer surgical instruments and shorter treatment times make this a smart investment.
- Versatile – Ideal for cases with low bone volume or when traditional implants are not an option.

Discover the benefits of BIONIKA mini implants and offer your patients a fast, effective, and long-lasting solution!
