Trust Hungarian-made implants!

Professionals who are just beginning their journey in implantology often ask which implant type or brand would be the best choice for them. This is completely understandable — after all, new systems appear on the market every year. While multinational companies rely on mass production to sell vast quantities of standardized products, BIONIKA, as a Hungarian manufacturer, focuses on developing tools tailored to the specific needs of professionals and the individual characteristics of patients. What can a Hungarian SME offer compared to a multinational? A lot!

József Hajdú

founding owner,
executive manager

BIONIKA's goal is to design and produce high-quality instruments that support patient recovery and improve their quality of life.

What sets us apart:

- A friendly, always available customer service team — you can reach us via WhatsApp, phone, email, or social media.
- Hungarian precision and creativity — the same innovative spirit that gave the world the Rubik's Cube, the ballpoint pen, vitamin C, the hologram, and the safety match.
- Identifying Unknown Implants — we specialize in solving mysteries.
- Components for Discontinued Products — ensuring your practice can stay current and fully functional.
- Over 35 Years of Legacy — a proud family business spanning generations.
- A Complete Implant Product Range — from implants to instruments to titanium meshes.

Choosing BIONIKA offers many advantages: faster delivery, efficient customer service, strict regulatory compliance, and support for the local economy and Hungarian innovation. The name BIONIKA stands for quality — ensuring that you and your patients always receive the highest standard of products and services.

Don't forget — BIONIKA gives a face to its products!

MULTI-UNIT ABUTMENTS

For screw-retained restorations, we recommend Multi-unit (bar) abutments, as they can be used in both straight and angle-corrected cases.
