Did you know that the BIONIKA CORTILOG implant family covers every dental implantation need? Whether you are looking for mini, one-stage, two-stage, or temporary solutions, the versatility and compatibility of the CORTILOG system guarantee successful treatments. CORTILOG implants are

designed with a single purpose: to make implantation procedures simpler, more efficient, and more successful, while providing patients with durable, aesthetic, and natural dental restorations. The implant family also offers solutions for low bone mass, narrow spaces, or special clinical cases. The CORTILOG PCL SHORT implant can be used successfully even with low bone height, while the CORTILOG MCL implant offers immediate load-bearing options for your patients.

József Hajdú

founding owner,
executive manager

What makes CORTILOG so versatile?

- Innovative technology: Micro-movement-free force transmission and precise impression taking options help ensure accurate dental restorations.
- Compatibility: The CORTILOG PCL aligns with the Camlog® system, and CORTILOG CCL with the Conelog® system, making them seamlessly integrable with any existing tools.
- In-house design development: BIONIKA has contributed over 28,000 products to the advancement of the dental profession, guaranteeing world-class quality and continuous innovation.
- Excellent value: Premium quality at an accessible price, offering professionals a competitive alternative.

Try how BIONIKA implants can support your work, and join the professionals who have already experienced the benefits of CORTILOG!

CORTILOG

IMPLANT SYSTEM

Cortilog is proven not only in clinical trials but also in practice.

The CORTILOG product family, developed by BIONIKA, has become popular among professionals primarily due to its versatility and complexity. The CORTILOG system is a comprehensive, in-house design developed product family that includes mini, one-piece, two-piece, and temporary implants, so everyone can find the right solution within a single system.
