# WELCOME

**József Hajdú**  
founding owner,  
executive manager

Today, it is difficult for dentists and dental technicians to find suitable abutments, as they encounter many different systems on the market. However, it is essential that dental restorations are made with high-quality prosthetic components. These abutments serve as the supporting "pillars" of the prosthesis and play an important role in achieving a professional final result. BIONIKA UNIFORM provides a solution for this, offering an extremely wide and compatible range of abutments with excellent quality. With a unified design and brand-specific compatibility, it guarantees that you will always find the right solution for any situation.

## Why choose BIONIKA UNIFORM abutments?

- **Precise fit:** Our abutments are fully compatible with the most widely used, well-established implant systems from leading manufacturers.
- **Wide selection:** More than 100 geometries are available for titanium, plastic, and zirconia restorations.
- **Identification of implants:** We also provide solutions for cases where the implant in the patient's mouth is unknown.
- **Reliable materials:** We work only with high-quality materials from trusted sources.
- **Excellent quality at affordable prices:** Our products offer outstanding value for money, ensuring high quality at accessible prices.
- **Professional consultation:** Our experts are available to provide professional support in selecting the best solutions.

## BIONIKA LOYALTY PROGRAM

Join our loyalty program where you can earn points for your purchases, which you can redeem for valuable discounts and exclusive offers. We offer our loyal members unique offers and priority access to new products.

**Earn 10 point for every 10.00 €**

Spend 1,250 Loyalty points 10% off discount

**ONLY AVAILABLE FOR WEBSHOP ORDERS!**

## Why is it worth joining the loyalty program?

**Easy points redemption: no cards required, online!**

No cards are needed to redeem loyalty points, which can easily get lost. In the BIONIKA webshop, after registration or login, you can access your points at any time!

**Step up to membership level for extra discounts!**

As a member of our loyalty program, you can benefit from special discounts and exclusive offers to save money on every purchase. Collect points, move up the membership levels and enjoy the benefits!

## HOW CAN YOU EARN LOYALTY POINTS?

**Create your own account in the online store!**

**Enter your date of birth!**

**Buy Bionika products online!**

**Recommend BIONIKA to your friends!**

**Follow and like us on our social platforms!**

*Premium quality, reliable foundations certified by a Swiss certification body!*

# SCANDREA IMPLANT SYSTEM

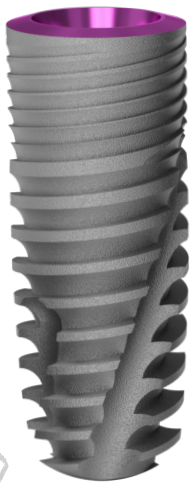

## IMPLANTS

**CHOOSE THE BEST THREAD STRUCTURE!**

Scandrea premium implants

**20% DISCOUNT**

### SCANDREA implant system

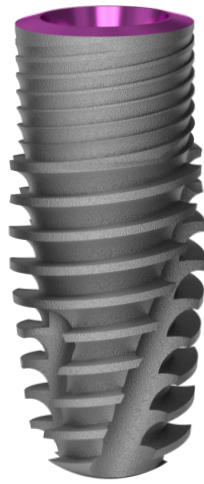

**20% DISCOUNT**

#### Standard (regular) contour implant

A universal solution offering balanced primary stability and a wide range of indications. Ideal for average bone conditions and soft tissue situations.

### SCANDREA+ implant system

**20% DISCOUNT**

#### Raised-contour implant

The elevated cervical design helps support and shape soft tissues more effectively. Especially beneficial in the aesthetic zone or in cases where gingival profile optimization is important.

### SCANDREA++ implant system

**20% DISCOUNT**

#### Double raised-contour implant

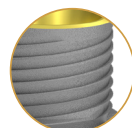

Features an even more pronounced cervical design, providing enhanced soft tissue support. This design is especially recommended for thin biotypes, reduced bone levels, or high aesthetic demands, where creating a stable and natural gingival contour is crucial.

## PREMIUM solution with 20 years of experience to meet the highest standards

#### Conical-Connection

We use a connection that results in micromotion-free force transmission and provides favorable conditions for accurate impression taking.

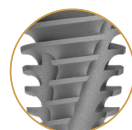

#### Spirally micro-grooved surface

The micro-grooved spiral surface acts as a significant load-bearing element. The self-locking thread structure and the cycloidal threading ensure a micromovement-free state and rapid insertion.

#### Cortical Level

The chances of implant retention are significantly improved if the upper rim of the implant is placed at or below the cortical level.

#### Anatomical tooth root shape

The implant's screw thread taper, high thread pitch and thread depth, self-locking and self-tapping design provide bone compression and, with care, immediate loading.

#### Platform switching

The diameter of the abutment attached to the implant is smaller than the outer part of the implant attached to the bone, so that the bone can slide onto the upper rim of the implant.

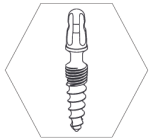

#### Rounded implant end

Facilitates minor changes of direction when inserting the implant and provides extra stability.
