August

WELCOME

From my early youth, I wanted to be an engineer in my own factory. I have always been attracted to technological innovation. I was particularly interested in medical technology. In 1989 my family and I took the opportunity to start our first real company. My son was my support in R&D. His sensitivity to new technologies

József Hajdú
founding owner,
executive manager

gave the impetus to the development of our company. Today, we continue to move forward with a stable and young team in a field of continuous improvement, innovative solutions, and efficient service to our customers. The aim of our monthly Special Issue is to showcase the scientific work of BIONIKA, the result of the joint efforts of engineers, computer scientists, economists, doctors, and professionals who are all experts in their fields. With over 34 years of experience in the industry, we have had the opportunity to work with dentists like you to develop cutting-edge products. You don't know what kind of implant is in your patient's mouth? Are you ever challenged to remove

broken screws? Or have you ever tried to find a compatible component for a previously used, recalled dental implant brand? Are you looking for a trusted brand with a wide range of products and expert support? Do you have revolutionary ideas or insights into dental implant systems? Are you looking for a compatible screwdriver, wrench, or abutment? Are you interested in a pocket-sized implant surgical kit? The answer to all of these and more: BIONIKA. Thank you for choosing us so far. And if you don't know us yet, you can take a look at our brochure or contact us.

PCT titanium base

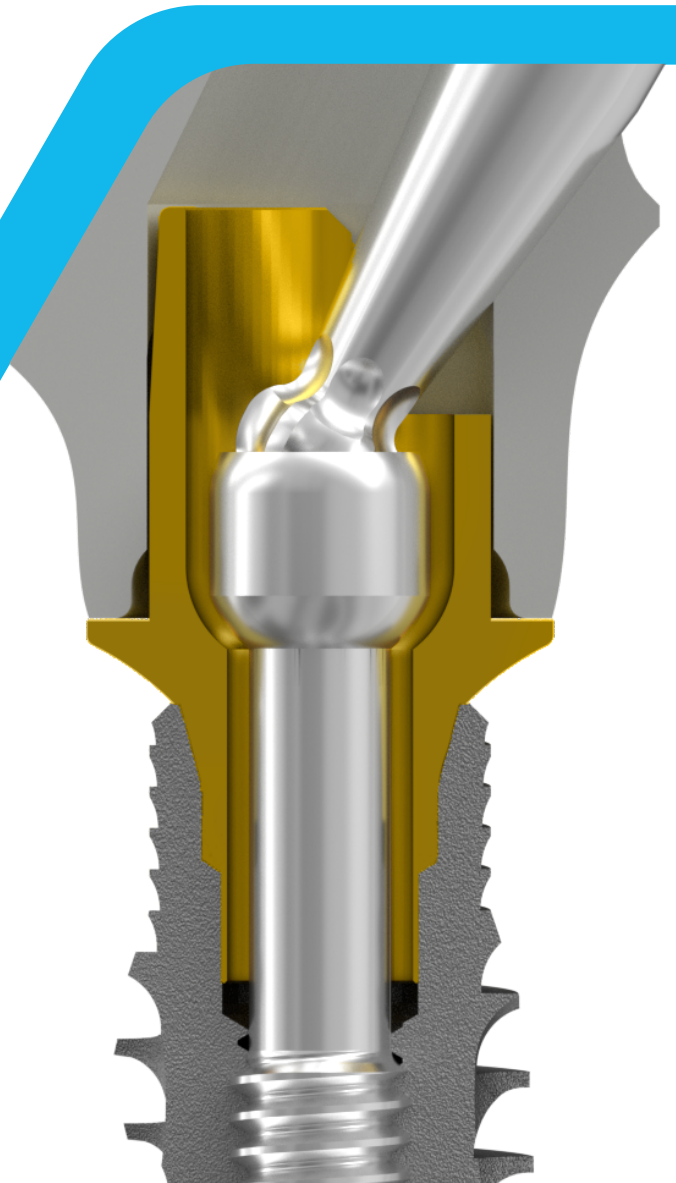

Developed and manufactured by BIONIKA, the PCT titanium base ensures an extremely precise fit and accurate operation, allowing professionals to achieve the best results during dental treatments. Thanks to the use of high-quality materials and advanced manufacturing processes, PCT titanium bases offer unrivaled stability and reliability in every single case. The PCT titanium base is a special version of the traditional titanium base, cut on one side.

The cut-design, combined with a suitable torx screwdriver with a spherical tip, allows the head screw to be screwed in at an angle.

**40%
DISCOUNT**

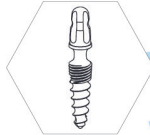

By using the PCT titanium base, angular corrections of up to 15°, 20° or 30° are possible.

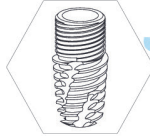

Boost your professional skills, and we'll inspire you!

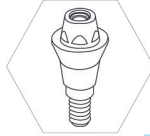

BIONIKA has been continuously **developing and manufacturing** its product range since 1989.
