May

# WELCOME

**József Hajdú**  
founding owner,  
executive manager

We trust that this period of renewal will give you the energy and motivation you need to do your best and put a confident smile on more patients' faces. We also would like to contribute to your professional plans by offering you our unique discounts. We are constantly developing our product structure to ensure that you can work with high-quality Hungarian medical devices at the best possible price. Thanks to our wide range of diameters and lengths, both single-phase and two-phase implant users will find the right solution for them. We have also thought about patients with decreased bone mineral density as

BIONIKA mini implants are designed to be a solution for cases where traditional implants are not possible. In addition to our abutments ideal for snap on, screw-retained and cement-retained dentures, we also offer a wide range of prosthetic and CAD-CAM elements. We also offer flat and 3D-bent titanium membranes for bone grafting which are perfectly adapted to the most common surgical techniques. It is not enough to find the perfect implant system, it is also essential to use the right instruments for a successful procedure. BIONIKA's instrument sets and screw-drivers facilitate the surgical process and contribute to the success of the intervention. If you have any innovative ideas, do not hesitate to contact BIONIKA! Let's work together and create new solutions to improve quality of life!
